PINE LUMBER CUTS

Board	Size	Cut Parts	Dimensions	Quantity
Board 1	1×2×8'	[P9] Stiffener Lip	56" long	1
Board 2	1×2×8'	[P10] Shelf Cleats	20" long	8
Board 3	2×4×8'	[P11] Base Skids	23.25" long	3

CUTTING TIPS FOR SUCCESS:

- ✓ Use a **panel saw** or **table saw** for straight, accurate cuts
- ✓ **Measure twice, cut once** - mark cut lines with pencil
- ✓ **Sand all edges** after cutting to remove splinters
- ✓ **Store cut parts safely** flat on sawhorses, not leaning
- ✓ **Ask hardware store to rip plywood** into 23.25" strips (usually free or cheap)
- ✓ **Keep all scrap lumber** - useful for test pieces and bracing
